ADDITIONAL INFORMATION

Certifications

In November 2016, I've earned ISTQB Certified Tester - Foundation Level.
In December 2018, I've earned MiFIR and Emir certifications, issued by London Stock Exchange

Publications

I published an article that presents the European Neighbourhood Policy Package. The article can be accessed from the following link: http://www.ier.ro/en/eir-newsletter-no-53-may-2013.html.

Projects

- As a personal project, I've developed a portfolio with four small applications, developed using
- VB.NET and C++ technologies, which can be accessed through the following link:
- https://github.com/LaurentiuGabriel. The portfolio contains the following software projects:
  - A calculator for computing the prices for European and American call and put options,
  - using Black & Scholes and Binomial pricing models.
  - An interval timer programmed for high-intensity interval trainings.
  - A chess application that runs in the console.
  - A visual application that generates random patterns of pixels with different speed and trajectories developed using SDL library
- I participated at an intensive course on European Studies at the Vrije Universiteit from Brussels.
- I organized a project meant to raise the awareness of young students about active citizenship and the European Citizenship Initiative.
- I organized a series of presentations that were held within National School of Political and Administrative Studies from Bucharest, with the main purpose of teaching students how the European institutions work. The presentations were part of a project developed with the help of six colleagues from other faculties.
